PRIVACY FLAG

Overview

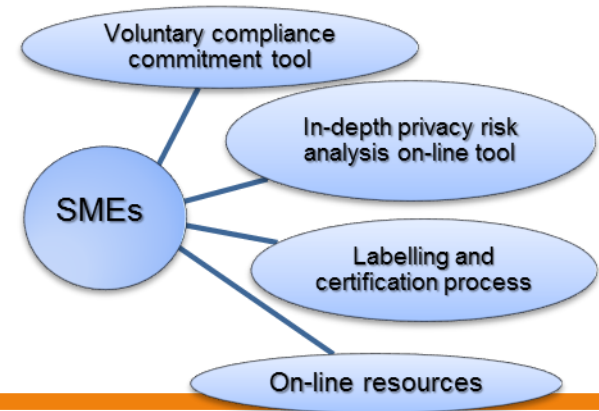

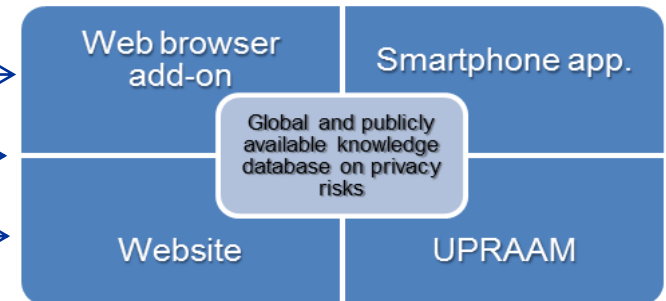

WHAT

- **Research and combination of the potential of crowdsourcing, ICT technologies and legal expertise** to protect citizens' privacy when visiting websites, using smartphone applications or living in a smart city.

- **Enable citizens to monitor and control their privacy.**
- **Provide user-friendly tools** for smart phone and web browsers, enabling citizens to easily identify the level of privacy risk.
- **Build a global knowledge database on privacy risks** related to websites, smart phone applications and smart cities.

- **Raise awareness of other stakeholders,** by providing a positive incentive to privacy friendly companies and services **versus** privacy-unfriendly ones.

HOW

PRIVACY FLAG

Objectives_(1)

1. Develop a highly scalable privacy monitoring and protection solution based on:

- **Crowd sourcing mechanisms** to identify, monitor and assess privacy-related risks.
- **Privacy monitoring agents** distributed on users' smart phones and web browsers, *to identify privacy threatening activities and applications.*
- **Universal Privacy Risk Area Assessment Methodology (UPRAAM)** *tailored on European and international legal norms on personal data protection and data ownership;*
- **Personal Data Valuation mechanism** for citizens;
- **Privacy enablers** for citizens to retain control over their privacy with optimized anonymisation techniques against traffic monitoring and finger printing;
- **User-friendly interface** informing the users and raising citizen awareness on their privacy risks *when using a smart phone application or visiting a website.*

GROUP OF COMPANIES

Co-funded by the
European Union

Co-funded by the
Swiss Confederation

PRIVACY FLAG

Objectives_(2)

2. Develop a global knowledge database of identified privacy risks *with websites, smart phone applications and smart cities deployments*, together with on-line services to support companies and other stakeholders in becoming privacy-friendly, *including:*

- **In-depth privacy risk analytical tool and services.**
- **Voluntary legally binding mechanism for companies located outside of Europe** to align with and abide to European standards in terms of personal data protection.
- **Services** for companies *interested in being privacy-friendly.*
- **Labelling and certification** process and service.

Co-funded by the
European Union

Co-funded by the
Swiss Confederation

GROUP OF COMPANIES

PRIVACY FLAG

Objectives_(3)

3. Actively disseminate towards the public and specialized communities, and SDOs, *including ICT lawyers, policy makers and academics.*

- **Privacy Flag will develop a privacy defenders community and will establish a legal entity with a sound business plan to ensure a long term exploitation, sustainability and maintenance of the Privacy Flag platform and services.**

Work Plan

- **WP1 Architecture design** will analyze end-user requirements to adapt and design a Privacy Flag architecture and process that will provide framework for activities in other WPs.
- **WP2 Privacy risks analysis and modelling** will research the privacy-related legal, technical and societal risks and design the privacy risk analytical framework.
- **WP3 Assessment tools** will research and develop the risk assessment tools, including the crowd-sourcing tools for risk assessment and data valuation, the in depth evaluation tools and the Voluntary compliance commitment tool.
- **WP4 Technical enablers** will focus on researching and developing technical enablers, including the smartphone application, the browser add-ons and the security and privacy enablers.
- **WP5 Integration, tests and validation** will interconnect and integrate the various pilot buildings with the Privacy Flag platform, including the database and server implementation, the website and backend management platform, as well as end-user tests and validation.
- **WP6 Outreach, dissemination and exploitation** will focus on the dissemination and exploitation of the results, including the implementation of the business plan envisaged for the sustainability of the crowdsourcing platform and community.
- **WP7 Coordination and management** will deal with the day-to-day management of the project.

Expected Outcomes

1. Three user-friendly and freely available tools for citizens
2. Distributed crowd-sourcing privacy monitoring platform
3. Universal Privacy Risk Area Assessment Tool & Methodology
4. Privacy enablers
5. Global knowledge database on privacy risks
6. Voluntary compliance commitment tool
7. On-line resources
8. In-depth privacy risk analysis on-line tool
9. Contributions to labelling and certification processes
10. Contributions to standardization on privacy

PRIVACY FLAG

Impact

Providing an on-going platform for privacy protection

Improving privacy and personal data ownership

- *Improving privacy risk detection*
- *Improving personal data valuation*
- *Rebalancing the inherent asymmetry in ICT data protection*
- *Scalability and viral dissemination*
- *Designing a open standard for privacy risk analysis*
- *In-depth analysis, labelling and certification*

Societal impact and user awareness

- *Towards a democratic model of privacy management*
- *Extending the geographic scope of personal data protection*
- *Exploring potential room for a new international convention*
- *User awareness*

Economic Impact

- *Rebalancing and mitigating unfair competitive advantages*
- *Supporting European SMEs and industry*
