Synchronized App Control

33%

of customers have discovered
up to 100 new applications

67%

of customers have discovered
>100 new applications

An Elegant Solution to Today's App Control Problem

1

Unknown Application

XG Firewall sees app traffic that does not match a signature

100%

App Identification and Control

2

Endpoint Shares App Info

Sophos Endpoint passes app name, path and even category to XG Firewall for classification

3

Application is Classified & Controlled

Automatically categorize and control where possible or admin can manually set category or policy to apply.

“No other company is close to delivering this type of synchronized and integrated communication between endpoint and network security products.”

Chris Christiansen, VP of Security Products, IDC

Mission

Our mission is to be the best in the world at delivering innovative, simple, and highly-effective cybersecurity solutions to IT professionals and the channel that serves them.

Strategy

- ✓ Simple enough for small organizations, yet powerful enough for the enterprise.
- ✓ Security made simple. Innovative, simple, and highly-effective security solutions
- ✓ Sophos Central. Single, integrated cloud-based management platform
- ✓ Synchronized security. Security components that actively communicate with and enhance each other, spanning endpoint, network, and our entire product portfolio

SOPHOS
Security made simple.
